

This guide will help you set up an IPSec connection using IKEv2.

1. On your iOS device, navigate to **Settings** -> **VPN** and click on the **Add VPN Configuration** button.
2. Enter the following configuration:
 - **Type** - IKEv2
 - **Description** - Any description to identify VPN server
 - **Server** - Choose any from the server list ex: eu-nl-ams.321inter.net
 - **Remote ID** - Same as the Server field
 - **Local ID** - VPN Username
 - **User Authentication type** - Username
 - **Username** - Your VPN username
 - **Password** - Your VPN password
 - **Proxy settings** - Off
3. Tap **Done** to finalize the setup.
4. Your newly created VPN configuration is now available.
5. Tap on the switch button to connect or disconnect
